ABSTRACT

Westinghouse Hanford Company manages and operates the Hanford Site 200 Area radioactive solid waste storage and disposal facilities for the U.S. Department of Energy-Richland Operations Office under contract DE-AC06-87RL10930. These facilities include radioactive solid waste disposal sites and radioactive solid waste storage areas. This document summarizes the amount of radioactive materials that have been buried and stored in the 200 Area radioactive solid waste storage and disposal facilities since startup in 1944 through calendar year 1988.

INTRODUCTION

This document summarizes the amount of radioactive materials that have been buried and stored in the 200 Area burial ground facilities during calendar year (CY) 1988 (see Table 1). In addition to the data for CY 1988, cumulative data is presented. This document also lists decayed activity for the plant burial sites.

Table 1. Summary of Document Data.

Pages	Data
3-11	Amount of radioactive materials buried and stored within the Westinghouse Hanford Company's 200 Area plateau since startup.
13-17	Listing of the decayed activities in the various burial ground facilities from startup through CY 1988.
19-23	Estimate of the radioactive materials in the unsegregated burial sites.
25-26	Decay status of unsegregated waste from startup to present.
28-36	Amount of radioactive materials in the non-transuranic disposal or storage facilities.
38-43	Decay status of non-transuranic waste from 1970 to present.
45-49	Amount of radioactive material in the transuranic segregated storage sites.
51-52	Decay status of the transuranic segregated waste from 1970 to present.
54-60	Summary of waste received for disposal or storage for CY 1988.
62-97	Summary of waste received for each burial ground facility.

It should be noted that the summation of ^{90}Sr , ^{106}Ru , ^{137}Cs , and other radionuclides does not equal the total curie amount. The difference is the amount of other mixed fission products present in the burials that are not noted in this report. The reported curies values do not include the activities for the radioactive daughters. The data for plutonium for waste disposed prior to 1970 could be biased low by about 300 kilograms.

This document was prepared using the NOMAD2 computer program which resulted in more accurate and updated data. The computer-generated data in the tables are presented using exponential notation; an example of this form is presented below:

$$2.41 \text{ E+06} = 2.41 \times 10^{+6} = 2,410,000$$

$$2.41 \text{ E-06} = 2.41 \times 10^{-6} = 0.00000241$$

Footnotes for 105-N are offset listed for convenience in the OTHER RADIOACTIVITY (CURIES) column for information purposes, but are not included in the totals for OTHER RADIOACTIVITY radionuclides. The ^{137}Cs is however included in the ^{137}Cs column. An example follows:

OTHER RADIOACTIVITY (CURIES)

		(OTHER TOTAL)
C-14	5.660E+02	(OTHER)
CO-60	1.234E+01	(OTHER)
